Accessibility Service Provider List

The following is a list of organizations that conduct educational assessments. These are merely suggested contacts, not referrals. When using medical insurance, use the term "neuropsychological evaluation" with your primary care physician; doing so may assist in getting a medical referral for evaluation. Once the evaluation and results have been concluded that confirm a disability, reasonable accommodations can be made for Anoka Technical College students. Students will need to complete an "Application for Accommodations" and schedule and intake meeting. More information can be found at:
