Program Information
The Anoka Technical College Welding Fabricator certificate is a 17-credit program which offers individuals the opportunity to develop skills necessary for construction, manufacturing, building, and fabrication of real weldments. Students entering this certificate program have good welding ability, but seek greater applications skills.

Certifications
The Welding program not only provides students with a thorough background in welding and related theory, but also prepares students with the knowledge and skills need to take three national certification examinations:
- American Society of Mechanical Engineers
- American Petroleum Institute
- American Welding Society’s Welding Code

Admission Requirements
Must complete the Welding Technology diploma or be in the Welding Associate of Applied Science (AAS) degree.

Course Prerequisites
Successful Completion of WELD 1022, WELD 1024, WELD 1026, WELD 1028, WELD 1034, and WELD 1036.

Graduation Requirements
All Anoka Technical College students seeking an Associate in Applied Science (AAS), diploma, or certificate must meet the cumulative grade point average (GPA) of 2.0 or higher.

Transfer Opportunities
The courses in the Fabricator certificate serves as the third semester courses in the Associate of Applied Arts (AAS) degree in Welding program.

To see how credits from this program may transfer into other Anoka Technical College programs or into a program at another college, visit:
- Minnesota Transfer
- Anoka Technical College transfer student

Industry Information
The diversification of the welding industry impacts virtually every industry around the globe. From the depth of the world’s oceans to the far-reaching corners of outer space, there is a welding position for every hardworking, ambitious, smart individual who is ready and willing to constantly improve and strive for excellence.

A career choice in welding offers a vast array of options for employment and continuing personal development. Welding is the most common way to permanently join metal parts. Heat is applied to the pieces that are being joined, melting and fusing them together which forms a permanent bond.

Wages/Outlook/Advancement
Welders and solderers can advance to more skilled jobs with additional training and experience. For example, experienced welders may become technicians, supervisors, inspectors, or instructors. Other experienced welders and solderers open their own repair shops.

Wage information is available from the Minnesota Department of Education and Minnesota Department of Employment and Economic Development

Start Dates
Fall Semester.................................................................August

Program Sequence
Fall Semester .................................................................17
☐ WELD 1209 Basic Pipe Welding .................................3
☐ WELD 2000 Basic Pipe Layout .................................5
☐ WELD 2004 Metals Theory II .................................3
☐ WELD 2006 Welding Code Interpretation ...................2
☐ WELD 2008 Blueprint Reading III ............................4
