

Website Evaluation Exercise

Anoka Technical College Library Media Center

Objective: Locate an internet source that might be useful for academic purposes. Practice applying evaluation criteria to determine its value. Through this process, obtain a greater understanding of the lack of editorial standards on the internet.

1. The internet does not have editorial standards and regulations, and anyone can find a place to publish their unedited opinion and information. It's up to me, the reader, to decide if a site is credible. **TRUE FALSE**
2. Who is the author? What are his/her qualifications?
3. What, where, why: What is the website's address and what does it tell you about the sponsor and why the information is posted? Hint: look for an "about us" link, this is usually helpful.
4. When was it last updated? Or published/copyrighted? Is it the type of information that should be current to be useful?
5. Given this evaluation, do you think this site/article is suitable for academic use? **YES NO**
