Physical Electronics USA Inc. together with our parent company ULVAC-PHI Japan is a leading manufacturer of Ultra High Vacuum Surface Analysis Instrumentation world-wide. We are currently seeking an Associate Field Service Engineer to join our team in Chanhassen for 18 to 24 months of training followed by relocation within the Midwest region. This person will cross train by working with several departments in preparation for independent Field Service work. As a Field Service Engineer, you will be installing surface analysis instruments as well as maintaining / repairing the instruments and systems at customer sites.

Qualified candidates will have a minimum of an Associate Degree in Electronics or a Bachelors Degree in Electrical Engineering.

We offer a full benefits package and competitive wage with all the advantages of a small company environment.

Physical Electronics USA Inc. is an equal opportunity employer.
